SCANDINAVIAN HOMES

Beauty

Scandinavian design, fixtures and detailing - quality at a higher level
Individual interior design solutions

Comfort

Fully controlled ventilation featuring air filtering and heat recovery
Triple-glazed argon-filled windows for a draft-free environment

Ecology

Ultra-low energy or passive standard requiring no central heating
Built in timber from sustainable forestry - high recyclability

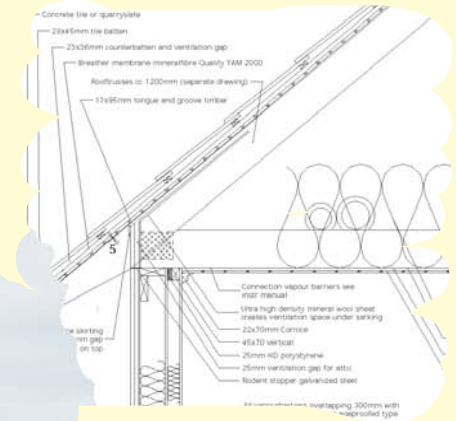

Quality

Off-site construction in a dry factory environment is a superior technique allowing industry-strength quality control
Scandinavian Homes has more than 20 years experience in off-site construction and is Europe's largest manufacturer of passivehouses

 ZERO-CARBON SOLUTIONS LTD

SCANDINAVIAN HOMES

For the first time a limited number of houses from Scandinavian Homes will be available for construction in the UK, limited by the availability of sustainably grown suitable timber. The houses use very little energy and are extremely cost effective and comfortable.

Individual solutions
Full architectural services
Four standard house ranges
Sizes adjustable in 1.2m modules
Available in 1, 1½, 2 and 2½ stories
Can be combined and extended as required, including porches and deckings

Construction to low energy or passivehouse standard
No central heating required
Airtightness to passivehouse standard - almost twice as good as current best UK practice
Mechanical low-power ventilation with heat recovery as standard
Solar energy and zero carbon solutions also available

Supplied directly from factory in Sweden to your build site
Off-site construction in dry conditions with industrial quality control

Beautiful interiors using top quality Scandinavian and German components for long life, easy maintenance and top value
All construction timber comes from sustainable forests
